## 3R solutions

© Copyright 2010 Cornerstone Technology B.V.

The captain of the Titanic did not lack information  
but failed to interpret it correctly  
in order to make the appropriate decision.

Even worse:

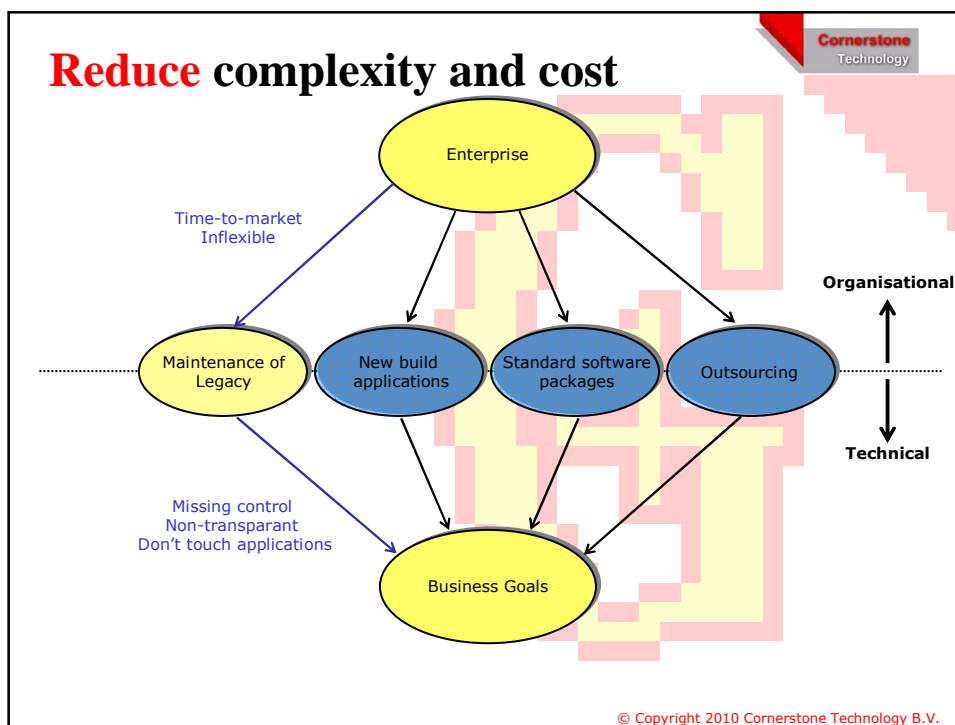

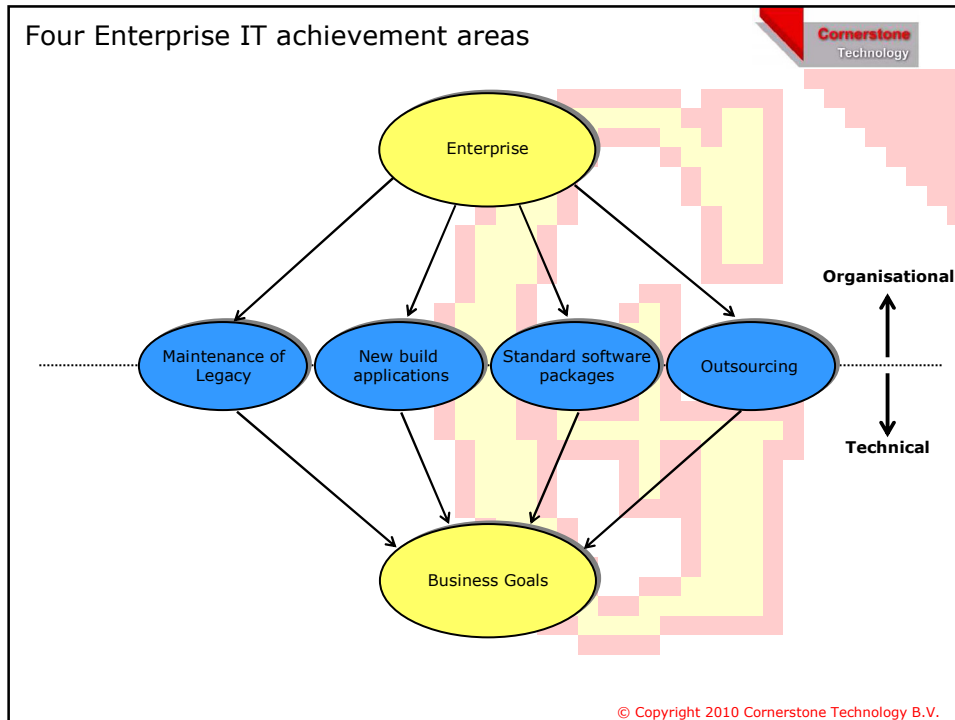

IT-projects fail because information is disregarded,  
despite alerts. Who is to blame?  
Collisions with icebergs is not common,  
but the implementation of an enterprise IT-system is.

## FOUR IT – BATTLE FIELDS

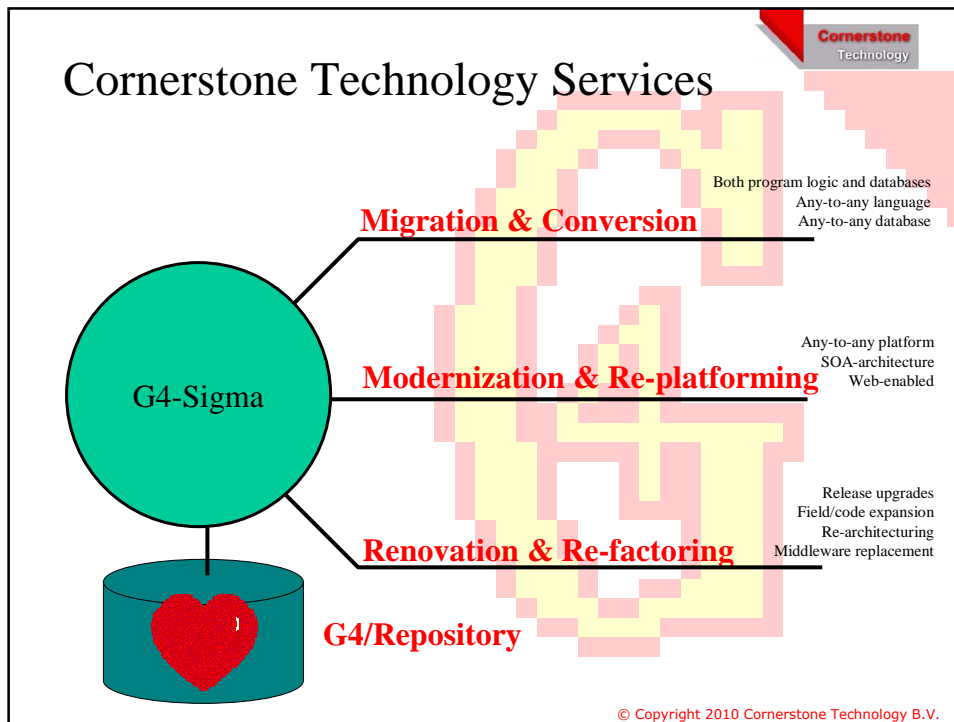

Existing legacy:	Unpermeable mass, complex, vulnerable, hardly time-to-market
New developments:	Costly, overdue, prone to cut-off decisions
Standard Packages:	Missing functionality, release upgrade worries, a maintenance problem itself
Outsourcing:	Choking SLA, knowledge drain, less value for money

# Conclusion

## G4-Sigma: 3R solutions for complex IT-shops

- One tool, one methodology, one project strategy for:
  - Application analysis & documentation
  - Modernization & re-platforming
  - Conversion & migration
  - Outsourcing & out-tasking
  - Maintenance & control
- Any language, any database
- Any project size, any project complexity
- Configurable, scalable, flexible
- Customer business can go on, no application freeze

Something that is useful, must be simple  
- Lincoln -

**G4-Sigma: Standard Software for IT itself**

one solution,  
one strategy,  
one learning curve,  
one stop shopping

**Simple enough?**
